ZENEX IMPLANT SYSTEM FIXTURE

IZEN implant provides more convenient, stables and optimized implant system by building product line-up with high-end technology of ZENEX MULTI and ZENEX PLUS.

ZENEX Multi Fixture Features

PLAZMAX Z1

PLAZMAX Z1 removes hydrocarbons and organic matter that interferes with the adhesion and proliferation of osteoblasts in a vacuum plasma environment. Implant surface becomes hydrophilic to attract more blood and enhance osseointegration efficacy.

Model	PLAZMAX Z1
Size (mm)	150 x 354 x 267
Display	Capacitive touch IPS LCD
Number of Channel	2
Processing Time	60 ~120 sec
Input Power	220V, 50~60Hz
Power consumption	Below 200W
Weight	8KG

* Term & Condition Apply

PERFIT Vinyl Polysiloxane Impression Material (VPS)

HUGE | VinciSmile®

Putty Type 0

Hand-mix

Standard packing (400g base + 400g catalyst + 2 spoons)

Type: Regular setting

MDA
GA752542L-60678

Indications:
For crown, bridge, inlay and onlay impressions.
Recommended for use with material in two-step impression technique.

- Good linear dimensional stability
- Excellent deformation recovery performance
- High tear strength and tensile strength

RM 180.00 nett

Heavy Body Type 1

Dispenser-mix

Standard packing (50ml x 2 Cartridges)

Type: Regular Setting

MDA
GA663772L-71430

Indications:
For crown, bridge, inlay, onlay, implant, orthodontic and full denture impressions.
Recommended for use with wash material in one-step or two-step impression technique.

- Easy and efficient operation
- High precision and dimensional stability
- High tear strength and tensile strength
- Especially suitable for border molding

RM 80.00 nett

Monophase Type 2

Dispenser-mix

Standard packing (50ml x 2 Cartridges)

Type: Regular Setting

MDA
GA6936825-217835

Indications:
For crown, bridge, inlay, onlay and implant impressions.
Recommended for one-step impression technique.

- High hydrophilicity and thixotropy
- Moderate flow for high impression accuracy
- Excellent handing properties, easy to use
- High tear and tensile strength
- Good dimensional stability - up to 28 days

RM 80.00 nett

Light Body Type 3

Dispenser-mix

Standard packing (50ml x 2 Cartridges)

Type: Regular Setting

MDA
GA6756L2L-71439

Indications:
For crown, bridge, inlay, onlay, implant, orthodontic and full denture impressions.
Recommended for use with tray material in two-step or one-step (simultaneous) impression technique.

- Excellent fluidity and stability
- High hydrophilicity and excellent thixotropy
- Excellent detail reproduction ability

RM 80.00 nett

Glass Ionomer Cement Filling I (VGIC131/140)

MDA
GA2472623-138270

Luting I is a truly biocompatible, quick-set, contemporary luting glass ionomer cement that ensures reliable and long-lasting restorations.

Standard packing: 15g x 1 Powder
12g(10ML) x 1 Liquid
Measuring scoop
Mixing pad

Shade: A2 , A3

- Sustained release of fluoride ions
- Chemically bond to tooth structure for excellent edge sealing
- Optimum thixotropy and ideal film thickness
- Simple, convenient and efficient to operate
- Easier to clean than resin-bonded material

RM 100.00 nett

P-Etchant

Phosphoric Acid Etching Gel

Standard packing: 3ml / syringe

- Phosphoric Acid Etching Gel is a flowable gel with excellent water solubility and miscibility.
- Its color is blue, which can be identified easily on the tooth or a repairing surface with contrast.

RM 20.00 nett

For healthcare professionals only

DenFil
Light-cured Restotative Mirco-Hybrid Composite Resin

Features & Benefits
- Excellent marginal sealing by minimum polymerization shrinkage
- Optimal viscosity for excellent workability
- Various shades and transparency
- High radiopaque

Indications
- Posterior (class I, II, V) and anterior (class III, IV, V) restoration
- Core build-up
- Splinting

- Refill (4g x 1 syringe)
  Shade : A1, A2, A3, A3.5, B1, B2, B3, C2, C3, D3, A20, A30, I, P, E

BUY 3 FREE 1

RM 53.00

DenFil N
Light-cured Restorative Nano Hybrid Composit Resin

Features & Benefits
- Multi Nano-Sized Particle distribution Technology (MNPT)
- High esthetic appearance
- Optical handling and non-slumping
- High radiopaque

Indications
- Posterior (class I, II, V) and anterior (class III, IV, V) restoration
- Core build-up
- Splinting

- Refill (4g x 1 syringe)
  Shade : A1, A2, A3, A3.5, B1, B2, C1, A20, A30, BL

BUY 3 FREE 1

RM 62.00

DenFil Flow
Light-cured Radiopaque Flowable Composite Resin

Features & Benefits
- Optimum flowability and handing
- Low polymerization shrinkage
- Nature-like esthetics by micro-hybrid fillets
- High radiopaque

Indications
- Restorations of Class III, Class V, Smaller Class IV
- Base/line in the class I, Class II restorations
- Pit and fissure sealant
- Undercut blockout

- Refill (2g x 1 syringe)
  Shade : A1, A2, A3, A3.5, B1, B2, B3, C2, A30, A2L, A3L, I

BUY 3 FREE 1

RM 50.00

DenFil Bulk Flow
Light-cured Flowable Bulk Fill Restorative Material

Features & Benefits
- Fast and easy procedure
- One increment up to 4mm
- Void-Free
- High radiopaque
- Good cavity adaptation
- Excellent wear resistance
- Satisfaction of the ISO 4049 requirements

Indications
- Base/Liner under direct restorations (Class I, II)
- Blocking out of undercuts
- Repair of composite/ceramic veneers
- Anterior restorations (Class III. IV)
- Class V restorations (cervical caries, root erosion, wedge shaped defects)

- Refill (2g x 1 syringe)
  Shade : U, A1, A2, A3, B1)
  - Accessories Disposable tips

i-MTA SP Root Canal Sealer And Repair Material

Bioceramic technology / Clinical first choice / Class III medical devices

Bioceramic Injectable Root Canal Sealer

[Needle-shaped hydroxyapatite Mineralization Product (HCA)]

Features & Benefits

Enhanced Biocompatibility

- Promotes tissue healing with minimal inflammatory response
- Releases calcium ions (from calcium hydroxide) to facilitate bone and tissue regeneration
- Produces calcium silicate hydrate, which progressively enchances sealing efficacy over time

Excellent Sealing Ability

- Zero shrinkage

Low Solubility

- 1.2%

Optimal Flowability

- High flow rate of 28.2 mm
- Thin film layer of 7.6 µm

28.5 mm Flow | 1.2% Solubility | 28.2 Mpa Strength | 7.6 µm Film thickness

NOW RM 80.00 1g Syringe

Arsenic-free Endodontic pulp Inactivating Agent (Quick-Effective)

Fast deactivation/ Low toxicity/ safe and efficient/ Low cost

M5DW

WET | 5 AXIS | ATC | HD touch screen | Millable material | Vertical milling 90° | Real-time monitoring

Wet & Dry Milling Machine

The M5DW is a newly developed 5-axis wet milling machine designed for the production and processing of glass ceramics, premilled abutment, PEEK, PMMA,Wax and composite materials.

It features a one-piece design with enhanced dust protection, and uses high-quality imported components for key control components.

It delivers micron-level cutting accuracy and is suitable for a wide range of machining applications.

It provides a simple and efficient digital cutting experience.

Technical Parameters

MODEL	:	M5DW-axis dental milling machine
Dimensions	:	741 x 443 x 715 mm
Weigth	:	127kg
Tool magazine	:	10
Input voltage	:	220V
Max. Spindle power	:	0.5kw
Max. Machine power	:	1.2kw
A/B axis milling angle	:	A-axis: 360° B-axis: ±30°
Milling mode	:	Wet milling
Max Spindle speed	:	3000-60000rpm
Processing stroke tange	:	XYZ:168/106/90
Spindle cooling method	:	/
Average milling time	:	Glass ceramics 15-30min Abutment 8-13min PMMA 8-12min Wax 6-8min

SOGA-SMART I

Perfect solution to periodontal ligament injections

MDA GA5433223-116022

Safe suction back function:
Digital intelligent touch sensing subversion of traditional innovative touch design

High precision and gold standard:
Real-time digital display of dosage, using the high-end sensors, Accurately calculate the amount of medicine that has been injected, the accuracy is not less than 0.1 ml.

Portable:
Induction charging free from cable and pedal.

Bring the adjustable soothing music:
Let charging free from cable and pedal.

3 Three injection modes:
The injection speed of each mode is automatically adjusted.

Eco-friendly and green:
Reusable booster pipes can be sterilized, ecocomical and more environmentally friendly at the same time.

WARRANTY 6 MONTH WARRANTY

* Term & Condition Apply

RM 1800.00

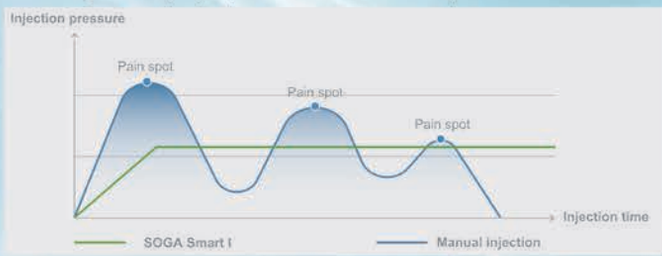

PDL Smart-Intraligamentary Injection

Smart system provides DPS technology that is capable of identifying specific tissues during the dental injection. The PDL mode allows the practitioner to accurately identify the periodontal ligament tissue.It also enables the clinician to maintain the correct needle position within the periodontal ligament when performing PDL injection.

Dynamic Pressure Sensing (DPS) Technology

The Smart system is equipped with an innovative DPS Technology which provides the user with "Real-Time" feedback of the actual pressures read at the tip of the tip of the needle during an anesthtic injection.The real time pressure is read many times per second and shown on the pressure sensing gauga. Clinical research has shown that successful intraligamentary injections are associated with relatively high injection pressures. The DPS technology provides the user with a feedback mechanism to indicate these higher pressures and thus guide the proper placement of the needle tip.

Technical specification

Injection volume: 1.8ml
High mode : 1.8ml / 1 min
Low mode : 1.8ml / 2 min
PDL mode : 1.8ml / 4 min
Dimensions : 175mm x 16mm
Weight : 70g

SOGA-SMART II

Precise and safe

Not change the dentist's usage habits:
Ergonomic and lightweight, the pen-holding operation is more convenient.

Removable handle:
Autoclavable and reusable.

Intelligent pressure real-time digital feedback:
Intelligent real-time pressure sensing technology and AI algorithm, accurately monitor the feedback injection pressure and adjust the injection pressure to keep within the appropriate range.

One-touch operation of injection and suction back:
Digital intelligent touch sensing subverts traditional touch design.

High precision and gold standard:
Real-time digital display of dosage, using the high-end sensors, Accurately calculate the amount of medicine that has been injected, the accuracy is not less than 0.1ml.

Portable:
Induction charging free from cable and pedal.

3 Three injection modes:
The injection speed of each mode is automatically adjusted.

Technical specification

Injection volume: 1.8ml

Cavitron® Select™ SPS™

Cavitron Ultrasonic Scaler

The Cavitron Select SPS ultrasonic scaler is a compact, portable unit that incorporates a self-contained reservoir with the Sustained Performance System technology.
This practical design delivers 30K oscillating scaling power without the need for a dedicated water line - all you need is a power supply.

Features	Benefits
• Self-contained system with reservoir	• Ability to deliver medicaments • No plumbing required
• Patented SPS technology	• Maintains clinical power at lower power setting
• Blue-Zone - extended low power range	• Increased patient comfort, especially during subgingival scaling
• Hands-Free Boost function	• Provides temporary power boost to remove heavy calculus, without leaving the patient to adjust power level
• 30K Technology	• More efficient, less noise
• Steri-Mate Handpiece - smaller and lighter	• More comfortable and with reduced fatigue •Rotates by over 300° to aid access
• Steri-Mate Handpiece - detachable	• Autoclavable and reduces risk of cross
• Accepts all 30K Cavitron Inserts	• Variety of inserts available to meet clinical needs
• Delivers warm water	• Increased patient comfort
• Water control on handpiece	• Easy water adjustment that doesn't require leaving the patient
• Compact size	• Requires less space and can be easily transported
• In-line water filter	• Prevents water line from becoming clagged

*Main unit warranty 2 year

*Handpiece & Cable warranty 6 months
*Term & Condition Apply

SmartLite® Pro

Modular LED Curing Light

NOW with EndoActivator

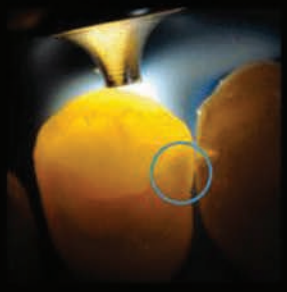

Remarkable pen-style design that feels balanced in the hand and beautiful in its details.

- **Modular concept, multi-functional with interchangeable tips**
- **360° rotatable tips**
- **LED tip provides excellent intra-oral access**
- **10mm of active diameter to cover bigger restorations**
- **Transillumination tips for alternative method to diagnosing caries**

The FOTI (Fiber Optic Transillumination) tip offers:
Simple, non-invasive, risk-free and painless alternative method to caries diagnosis.

Disruption of crystal structure deflects the light beam and produces shadows.

Visible fractures and crack formations.

Gutta-Smart™
Cordless Obturation Device

Optimize your obturation with the complete, low-temperature solution

Fill canals conveniently and reliably with Gutta-Smart™ cordless obturation device and Conform Fit™ gutta-percha master cones. Designed to work together, they feature the same low-temperature flow characteristics and radiopacity for a total warm vertical obturation solution.

The efficiency of a total solution. Paired with the enhanced fit of Conform Fit master cones, Gutta-Smart provides the efficiency you expect in a complete obturation solution.

Gutta-percha with low-temperature flow. In both Conform Fit master cones and Gutta-Smart cartridges, the gutta-percha formula flows at a lower temperature, requiring less heat from the handpieces.

The right fit you can feel. Conform Fit master cones provide a snug apical fit for accurate tug-back, while the cordless Gutta-Smart handpieces provide precise control and excellent tactile feedback.

All-day power*. A single charge gives you the power to complete an entire day's work.

Durable, cordless performance. Well-balanced, lightweight and comfortable to use, both handpieces are cordless for freedom of movement.

Technical Specifications:

- Reciprocating and rotary motions
- Includes file library with preset programs for WaveOne® Gold, ProTaper Ultimate®, TruNatomy®, and RECIPROC® family, and VDW.ROTATE endodontic file systems
- Customizable file sequences, compatible with other endodontic files and instruments
- Auto-reverse rotation at preset torque limit and at doctor's desired working length
- On/Off button on the motor handpiece or optional wireless footswitch
- Calibration function (CAL) for precise torque setting
- 7″ touchscreen interface
- Mini contra-angle with integrated 10-Lumen LED
- Lithium-ion battery
- Autonomous operation through a full day of work*
- Fully recharged in only 1 hour
- Motor can be run on battery only or can be recharged during treatment
- Universal charger (voltage 110–240, 50/60 Hz)
- Torque range: 0.2 N·cm – 7.5 N·cm
- Speed range: 100 rpm – 3,000 rpm
- Autoclavable handpiece sheath and contra-angle
- Upgradeable via Wi-Fi

Tetric N Ceram Bulk Fill 3.5g

Class I & II, Up to 4mm cure

Available Shade : IVA, IVB, IVW

Advantages

- Bulk Fill is possible due to Ivocerin, the patented light initiator
- Special filler technology ensures low shrinkage stress
- Esthetic results are achieved quickly and efficiently in the posterior region

Indications

- Restoration of deciduous teeth
- Restoration in the posterior region (Classes I and II, including the replacement of individual cusps)
- Class V restorations (cervical caries, root erosion, wedge-shaped defects)
- Reconstructive build-up
- Extended fissure sealing in molars and premolars

Multilink N

MDA
GB7936821-80144

Adhesive Cement System

The universal luting composite system Multilink N is suitable for the adhesive cementation of metal, metal-ceramic, all-ceramic and composite resing restorations. The luting composite and self-etch adhesive (Multilink N Primer) of the Multilink N-System are specially coordinated. The self-etch adhesive seals the dentin and ensures marginal integrity and high bond strength on enamel and dentin, which is attained in only ten minutes. It provides the basis for a strong and lasting bond.

Making People Smile

Features
- Strong and long lasting
- Universal application
- Easy cleanup of excess cement

Indicates
The universal luting composite is suitable for the placement of indirect restorations made of leucite-reinforced glass-ceramics (IPS Empress), lithium disilicate glass-ceramics (IPS e.max CAD/Press), composite resins (FRC Postec Plus, SR Nexco), oxide ceramics (IPS e.max ZirCAD), metal and metal-ceramics (IPS 99, IPS InLine System). Stratos 300 - Various Accessories

•Accessories Assortment " Average Value" (536382)

For Stratos 100, 200, 300

A) Instrument carrier
Holding device for horizontal guide, set-up table, 2-D setting-up temple, and bite fork support

B) Horizontal guide
Permits orientation of dentulous and edentulous models according to the Bonwill triangle.

C) 2-D setting-up template
For correct set-up according to average values, taking the spee and Wilson curves into consideration.

D) Set-up table
Permits easy average-value orientation of dentulous models according to the Bonwill triangle.

RM 3700.00

•Gnathometer M with UTS adapter (530484)

This intraoral registration device determines the acclusal position of edentulous patients. Needle-point tracing is used to check the occlusal position quickly and easily. Allparts snap together saving chairside time.

RM 2360.00/box

•Individual Guidance Plate (680584)

With this accessory, the lateral anterior guidance angle can be individually set to a value between 0° and 55°. The protrusive anterior guidance angle can be infinitely set to a value between 0° and 70°.

RM 1610.00

•Gnathometer CAD (687679)

For the intraoral determination of the occlusal position on CAD/CAM-fabricated 3D Bite Plates. For multiple use.

RM 1990.00

•Curved Incisal Pin With Holder (680585)

This accessory is required for the Individual Anterior Guidance Plate and permits precise, infinite lifting and lowering of the articulator height. A millimeter scale is used as the indicator.

RM 2133.00

•Magnetic base plate MB 12 (536403)

Bifluorid 10®

5% Sodium fluoride (equal to 22,600 ppm fluoride)
5% Calcium fluoride
[Solvent Based Consistency]

SingleDose 50 pcs., accessories

RM435/box

Above 3/ Members @ RM410

Bottle 4 g, Solvent bottle 10 ml

RM335/box

Above 3/ Members @ RM315

- Treatment of severe hypersensitive teeth
- Sealing of the dentinal tubules for cavity preparations or on sensitive root surfaces
- Desensitizer before and after bleaching
- "Bonding agent" like viscosity, self-cured 20 seconds

Remin Pro

Tooth Cream For Enamel Remineralization, Nano Hydroxyapatite, Water Based, 1450ppm Fluoride

RM740/box

Above 4/ Members @ RM720

Assorted, melon, strawberry
12x40g tubes per box

- After whitening & professional cleaning
- Acid neutralizer for caries prone patients
- Long term prevention and control of hypersensitivities
- Water based, free from milk and nuts element

Profluorid Varnish Single-Dose

5% Sodium Fluoride Varnish with 22,500ppm Fluoride; Resin Based Consistency

RM550/box

Above 3 @ RM485/box

Members:
Buy 1 @ RM435/box

48 x 0,40 ml for assorted
50 x 0,40 ml for individual flavors:
caramel, cherry, mint, melon, cola lime, pina colada, bubblegum

- Treatment of hypersensitive teeth
- Sealing the dentinal tubules for cavity preparations or on sensitive root surfaces
- No yellow discoloration of teeth - purified colophony resin
- Set immediately upon contact with water
- Dry application for best result
- Ready to use - peel and go concept

Profluorid Varnish Tube

5% Sodium Fluoride Varnish with 22,500ppm Fluoride; Resin Based Consistency

RM148/Tube

Above 3/ Members @ RM138/Tube

1x 10ml tube
caramel, cherry, mint, melon, cola lime, pina colada

- Treatment of hypersensitive teeth
- Sealing the dentinal tubules for cavity preparations or on sensitive root surfaces
- No yellow discoloration of teeth - purified colophony resin
- Set immediately upon contact with water
- Dry application for best result

Fluoride Varnish & Tooth Cream

Fissurit FX

Pit & Fissure Sealant-High Strength, Continuous fluoride release

RM270/box

Above 2/ Members @ RM235/box

Syringe 2 x 2,5 g

- Sealing/filling pits and fissures as well as small cavities
- Sealing/facing of damaged enamel surfaces, carious lesions & deciduous teeth.
- Filler content of 55 % w/w for outstanding abrasion pressures and loads
- Optimal flow properties with bendable metal cannulae for better control placement
- White contrast for easy visual control

Calcicur

Ready-to-use 45% Non Setting Calcium Hydroxide Paste For Medicament

RM200/box

1x Syringe 2,5 g, accessories

Above 3/ Members @ RM175/box

- Indirect capping for the treatment of caries profunda
- Direct capping when the pulp is opened or a pulpotomy is performed
- For temporary filling of root canals
- Suitable for use under any lining or restorative material • Immediately ready for use
- With high pH (12.5) known for antimicrobial effect
- Calcium hydroxide content of 45%
- Promotes the formation of tertiary dentin

Calcimol LC

Light-Cured radiopaque calcium hydroxide for liner

RM225/box

Above 2 @ RM210/box

Members:
Buy 3 @ RM199/box

Syringe 2 x 2,5 g, accessories

- Indirect pulp capping & lining under all filling materials
- Calcium ion release promotes hydroxyapatite and tertiary dentin growth
- Flow on demand – stays where you apply it
- Suited for pulp capping* and as a base liner under all restorative materials and cements
- High compressive strength for a solid foundation
- Precise placement, full control of setting time

Calcimol

Self-Cured radiopaque calcium hydroxide paste for liner

RM85/box

13g Base, 11g Catalyst.

- Indirect pulp capping
- Lining under all filling materials
- Effective protection of the pulp
- Suitable working time
- Contains 26% calcium hydroxide
- Supports the formation of tertiary dentin

Syringe 2 × 2 g universal accessories
Syringe 2 × 2 g A2, accessories
Caps 16 × 0.25 g universal
Caps 16 × 0.25 g A2

- 4mm base in class I and II cavities
- 6mm tips length (only in capsule version) for deep access
- Class III and V restorations
- Undercut block out
- Repair of small enamel defects
- Repair of small defects in aesthetic indirect restorations
- Core build-up

X-tra Fil

Packable Bulkfill Composite For Base and Occlusal

RM290/box

Above 4/ Members @
RM249/box

Syringe 5 g
Caps 20 × 0.25 g

- Class I and II restorations
- Core build-up
- 4 mm cure in 10 sec
- Low shrinkage of 1.7% by volume through multi-filler technology
- 86% filled by weight for great wear resistance
- One universal shade fits all.
- High translucency provides excellent chameleon effect for good esthetics
- Highly radiopaque (330% Al)
- Perfect for fast core build-ups

Bonding Agent & Bulkfill Composite

Aligner Flow LC

Fluorescent Composite For Clear Aligner Attachment

RM400/box

Above 2/ Member @ RM385/box

- **Fluorescence**: AlignerFlow LC glows under UV-A light for easy visualization during attachment, ensuring precise placement.
- Optimized Workflow**: Streamlines the attachment process with adjusted flowability, reducing deficits and excesses to prevent debonding.
- Durability Offers durability and abrasion resistance for reliable performance in aligner attachments.

Polofil NHT Syringe Refills

Nano Hybrid Packable Aesthetic Composite

RM145/Syringe

Above 4/ Members @ RM130/Syringe

Syringe 4g
A1, A2, A3, A3.5, B2, OA2

- Class I to V fillings
- Reconstruction of traumatically affected anteriors
- Facetting of discoloured anteriors
- Correction of shape and shade for better aesthetic appearance
- Locking, splinting of loose anteriors
- Repairing veneers
- Composite inlays

Polofil NHT Flow

Nano Hybrid Medium Viscosity Flowable Composite

RM100/Syringe

Above 3/ Members @ RM92/Syringe

Syringe 1.8g ,
A1, A2, A3

- Filling minimally invasive cavities of all classes
- Filling class I, II - V cavities including V-shaped defects and cervical caries
- Blocking out undercuts
- Repairing fillings and veneers
- Luting translucent prosthetic pieces (e.g. full ceramic crowns, etc.

Polofil Supra Refills

Micro Hybrid Packable Universal Composite

RM92/Syringe

Above 3/ Members @ RM90/Syringe

Syringe 4g
A1, A2, A3, A3.5, B2, B3, Incisal

- For cavities classes I to V
- Reconstruction of traumatically affected anteriors
- Veneering of discoloured anteriors
- Splinting, locking of teeth

Meron Plus QM

Resin Modified Glass Ionomers For Luting & Cementation

RM365/box

Above 3/ Members @ RM315/box

Automix syringe, 8,5g

- Cementation of: Metal-based inlays, onlays, crowns and bridges
- High-strength (zirconium dioxide-based) all-ceramic crowns and bridges, high-strength all-ceramic inlays Metal, ceramic and fiber posts
- Tack cure option
- Low film thickness, good translucency for RMGI group

Meron

Glass Ionomers For Luting & Cementation

RM220/box

Above 2/ Member @ RM205/box

Powder: 35g Liquid: 15ml

- Cementation of crowns, bridges, inlays, onlays, pins, posts and orthodontic bands
- Very good flow properties for good wet- ting behavior Low film thickness (15–20 µm) that saves occlusal adjustment time
- High translucency for better esthetic results with ceramics
- Easy excess removal – saves time
- High fluoride release

Provicol QM Aesthetics

Aesthetic Translucent Zinc Oxide Non Eugenol Cements For Temporary Crown & Bridge

RM265/box

Above 3/ Members @ RM240/box

Syringe, 5g

- Temporary cementation of provisional or definitive inlays, onlays, crowns, partial crowns/veneers and bridges
- Temporary filling of small one-surface cavities
- Translucent appearance that will not change the overlying color of the temporary
- Very low film thickness (7 µm) enhances the fit and secures an excellent retention
- Semi-elastic consistency allows for an easy clean up and removal.

Provicol Tube

Zinc Oxide Non Eugenol Cements For Temporary Crown & Bridge

RM150/box

Above 3/ Members @ RM125/box

Tube paste to paste
25g base, 25g catalyst

- Temporary cementation of crowns and bridges
- Contains calcium hydroxide which is known to have an antimicrobial effect that reduces postoperative sensitivities
- Good adhesion to temporaries
- Low film thickness for easy placement of temporary crowns & bridges for a perfect fit
- Peelable consistency for easy clean-up

Luting Glass Ionomers & Provisional Cement

Structur Premium

Porcelain Like FInishing, High Strength Temporary Crown & Bridge Material

RM740/box

Above 2/ Members @ RM685/box

Automix cartridge, 50ml
A1, A2, A3, A3.5, B1, BL *gun excluded

- Ceramic-like esthetics: brilliant gloss, natural fluorescence
- Hard as enamel - high fracture resistance, compressive and tensile strengths- ideal for long-span bridges
- Easy handling - fast and easy trimming and polishing, minimal inhibition layer, 1:1 standard dispenser
- Fast intraoral setting time (30-45 sec.)

Structur 3

Aesthetic Nano Filled Temporary Crown & Bridge Material

RM515/box

Above 2 @ RM472/box

Members:
Buy 1 RM485/box

Automix cartridge, 50ml
A1, A2, A3, A3.5, B1, BL
***gun excluded**

- No more polishing – just wipe with alcohol for a brilliant gloss
- Only 45 sec. intraoral setting time
- Small mixing tips and no more "bleeding" before changing mixing tips yields at least 20 more units per cartridge compared to 10:1 and 4:1 deliveries.
- Natural gloss and tooth-like fluorescence
- Suited for long-span bridges and long-term provisionals

Quick Up Kit

Tissue Colored Implant Pick-Up System

RM1150/box

Above 1/ Members @ RM999/box

Self Adhesive Composite Resin Cements

RM340/box

Above 4/ Members @ RM319/box

5 g QuickMix syringe, mixing tips type 14 and 15, type 1 intraoral tips
Shade: U (universal), White Opaque (WO) and Transparent (T)

- Definitive luting of inlays, onlays, crowns and bridges (not Maryland bridges) made from ceramic, zirconium dioxide, composites and metal Definitive luting of metal, ceramic, zirconium dioxide and fibre-reinforced posts
- Minimal film thickness of 10 µm for precisely fitted luting without elevating the bite
- Also suitable for zirconium dioxide
- Endo-mixing tips in each package – for the most precise application even in the root canal

Bifix Temp

Temporary Crown & Bridge Cement - Composite Based

RM250/box

Above 1/ Members @ RM230/box

QuickMix syringe 5 ml, accessories
Shade: universal,

- Temporary cementation of provisional restorations High strength for long term provisional cements
- Tack cure option for better control
- White translucent shade – high esthetics
- Strong adhesion – secures long-term temporaries
- 5 micron film thickness – no "jack-ups" of temporaries

Bifix QM

Dual-cured, Radiopaque, Resin-Based Adhesive Cement For Permanent Crown & Bridge

RM580/box

Above 4/ Members @ RM540/box

10 g QuickMix syringe
Shade: U (universal), White Opaque (WO) and Transparent (T)
Adhesive cementation of:

- Inlays and onlays
- Crowns (full and partial)
- Veneers, facets
- Pins and posts
- Bridges and adhesive bridges (Maryland bridges)
- Universal: for non-metal restorations (ceramic, also zirconium dioxide, and composite) as well as for metal restorations

Bifix Hybrid Abutment Kit

Universal, Dual - Curing Luting Composite For Intraoral and Extraoral Application

RM1200/box

REF 2410 Implant Set – QuickMix syringe 10 g (universal HO), Try-In syringe 2.5 g, Ceramic Bond bottle 5 ml, Futurabond U SingleDose 5 pcs., accessories

- Permanent extraoral and intraoral luting of superstructures (incl. mesostructures) made of metal, ceramics, zirconium dioxide and polymers (composite, hybrid ceramics or PMMA) on:
- Prefabricated adhesive/titanium bases (extraorally only)
- Customised titanium and zirconium dioxide bases (both extraorally and intraorally)
- Dental hard tissue

Resin Based Aesthetic Composite Cements

Rebilda Post Kit

size: 1.0, 1.2, 1.5, 2.0

- Cementation of crowns, bridges, inlays, onlays, pins, posts and orthodontic bands
- Very good flow properties for good wet- ting behavior Low film thickness (15–20 µm) that saves occlusal adjustment time
- High translucency for better esthetic results with ceramics
- Easy excess removal – saves time
- High fluoride release

Rebilda DC

Core Build Up & Fibre Post Cementation - Monoblock Concept

RM340/box

Above 3/ Members @ RM320/box

QuickMix syringe 10 g, accessories
Shade: Fluorescent Dentine, Blue, White,

- Adhesive core build-up on vital and non-vital teeth
- Luting of fibre-reinforced resin posts
- Light-curing for time-saving application
- Additional chemical curing for reliable processing
- Available in 10 g QuickMix syringes and 50 g cartridge
- In three shades: blue for easy identification of preparation margins, dentine for aesthetic reasons, white as an aesthetic contrast to dentine
- Optimised small mixing tips save material
- Low heat development even in bulk application

Rebilda Post GT Kit

Bundled Fibre Post Refill

RM2700/box

Above 1/ Members @ RM2530/box

REF 1972 Set 5 posts each of (~ ø 0.8 mm, ~ ø 1.0 mm, ~ ø 1.2 mm, ~ ø 1.4 mm), Ceramic Bond bottle 5 ml, Futurabond U SingleDose 20 pcs., Rebilda DC QuickMix syringe 10 g dentine, accessories

- Innovative bundled fine posts enable easy placement within any root canal morphology
- Minimizes the need to mechanically prepare root canals preserving healthy tooth structure and saving valuable chair time
- Increases surface area within build-up restoration maximizing adhesion and retention values
- Optimal adaptation to atypical canal anatomies to maximize the success of the restoration

Why Helios 500?

Fit for your budget
The price of HELIOS 500 is affordable by almost everyone, and at the same time, it provides high performance.

Improve your digital workflow
One of the most accurate and fastest scanners on the market.

Free your hands
Automatic and adaptive calibration, manual calibration is not necessary any more.

Make your experience comfortable
Smaller and lighter while achieving a 16mm x 14mm high-definition field of view. More friendly to people with sensitive teeth. (*The air duct inside the body has been upgraded.)

Accuracy
As one of the most accurate scanners on the market, HELIOS 500 has reached the state-of-the-art accuracy level- the average deviation of a in-vivo full arch scan is around 20.0μm.

Speed
Scan a full arch in less than 30 seconds with HELIOS 500.

Weight
Only 185 grams, one of the most lightweight scanners on the market, well-balanced, ergonomically designed, and easy to carry.

AI technology
AI technology filters the soft and moving tissues, offering users a smooth scanning experience and generating a natural-looking treatment outcomes

Experience it firsthand - Demo unit available.
Please call to schedule your demo

Autoclavable Tips

Smooth Surface Finish

Flexible Tips
* ONLY X Blue & Silver are Flexible Tips

Multiple Tip Options

In Action

Cavitation Effect

It Is the process of formation of milions of gas bubbles in the irrigation solution. These gas bubbles grow in size, oscillate in different directions and explode into liquid, producing powerful cleaning action

Acoustic Streaming

It is a unidirectional flow of liquid produced by ultrasonic waves. Movement of tip produces special effect called acoustic turbulence which accelerates the movement in liquid inside the root canal

* Term & Condition Apply

RM 1300.00

Indication

Smear Layer Removal

Effective in removal of smear layer and unplugging of dentinal tubules

Dentin Chips Removal

Ultrasonic agitation forms suspension of residual dentinal chips and tissue remnants with irrigant and facilitates their easy removal

Indication

Biofilm Disruption

Ultrasonic cavitation disrupts the biofilm and helps to reduce bacteria load in the canal

Cleaning of Complex Anatomy

Ultrasonic activation helps irrigants to flush into undetected or un-instrumented canal anatomy like isthmus, fins, lateral canals, apical ramification etc. Also to remove vapour lock

For healthcare professionals only

Broad Spectral Range 380 nm-515 nm
- Why broad spectral range?
- Most of resins use camphorquinone (CQ) materials, but some manufactures choose alternative initiators such as TPO to reduce the yellow impact caused by CQ. TPO can only be activated by the light wave below 410nm. CuringPen-E has a broad spectrum which could effectively cure different resins.

Ultra Power
- Light intensity now up to 3000mw / cm²
- High light intensity results in deeper cure depths which could curing resins more efficiently and with short time

Specifications:

Dimension	: 19 x 16.5 x 7.5 cm
Weight	: 120 g
Lens Size	: 8 mm
Power Supply	: >1200 times, 3000mw/cm²,3 sec
Maximum Light intensity	: 3000 mw / cm²
Spectral Range	: 380-515 nm

Working Modes

• P1
Normal Mode
Light Intensity : 1200mw / cm²
Time Setting : 5s, 10s, 15s, 20s, 25s, 30s, 35s, 40s

• P2
High Mode
Light Intensity : 2000mw / cm²
Time Setting : 1s, 3s, 5s, 10s

• P3
Ultra Mode
Light Intensity : 3000mw / cm²
Time Setting : 1s, 3s, 5s

• P4
Pulse Mode
Light Intensity : 1200mw / cm²
Time Setting : 5s, 10s, 15s, 20s

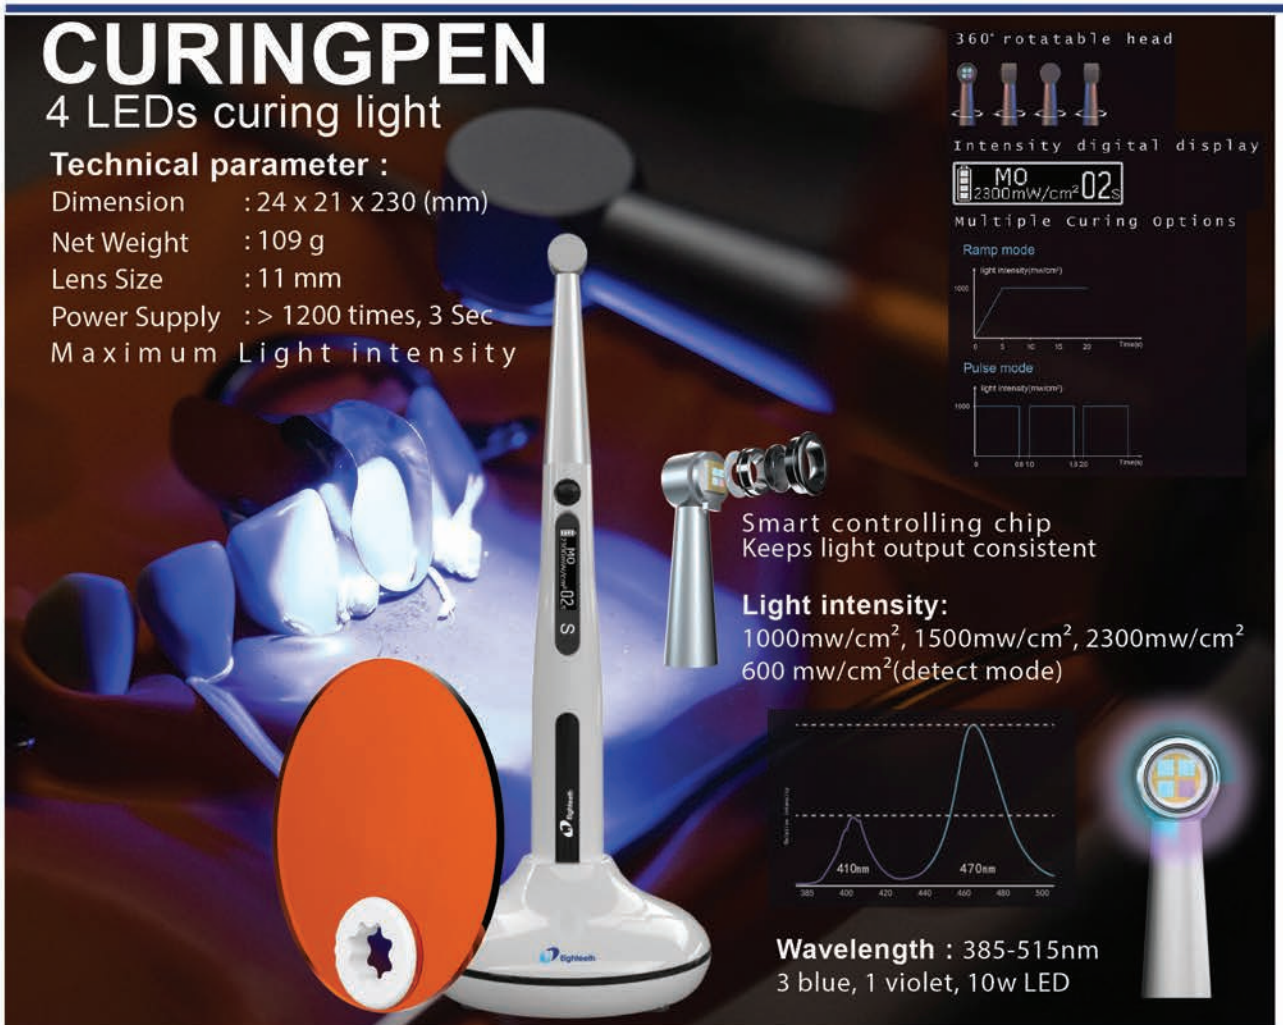

• P5
Ramp Mode
Light Intensity : 1200mw / cm²
Time Setting : 5s, 10s, 15s, 20s

Bevisto Orange Solvent

READY-TO-USE CLEANER

Advantage:
• Removes varnishes, impression pastes and zinc oxide cements from impression trays and instruments
• Removes different kinds of colour residues from textile materials
• Deep cleaning of all washable surfaces (such as laminate)
• Removes of solid fat residues and impurities
• Cleaning of glass surfaces (such as mirrors, windows, ETC)
• Removal of tar and corrosion residues (rust, verdigris, ETC)
• Free of aldehydes and phenols

Contain:
• 1 Liter

Bevisto Orange Solvent
1 liter (1021)
RM 230.00/Btl

BevistoTray Cleaner

BevistoTray cleaner is a liquid concentrate for cleaning and dissolving casting compounds and adhesives from medical impression trays and mixing instruments.
The dosage is 5% to 10% (about 50ml - 100ml BevistoTray Cleaner diluted in 1L of water).
This is done through by submersions, (example by placing an impression tray in a soaking tray filled with a BevistoTray Cleaner solution).

BevistoTray Cleaner is also suitable for use in ultrasonic baths.

Exposure time and dosages: Depending on the degree of contamination, we recommend one of the following dosages:
5 % (i.e. diluting 50 ml with 950 ml of warm water (< 40 °C) in a soaking tray or ultrasonic bath),
10 %(i.e. diluting 100 ml with 900 ml of warm water (< 40 °C) in a soaking tray or ultrasonic bath).
It is advisable to leave the impression trays and/or mixing instruments in the BevistoTray Cleaner solution overnight.
An exposure time of 15 minutes is sufficient in an ultrasonic bath.

Contain:
• 1 Liter

BevistoTray Cleaner
1 liter (3121)
RM 120.00/Btl

For healthcare professionals only

ID 213 Instrument Disinfection

Fully virucidal concentrate for disinfection and cleaning of general, surgical and rotating instruments.

- Bactericidal incl. tuberculocidal, fungicidal, virucidal
- Extraordinary cleaning effect - breaks up even the most stubborn fouling
- Especially economical with a long usable life of 14 days
- Corrossion inhibitors ensure excellent material compability

Available as : 1 Litre
RM 182.00/Btl

Available as : 2.5 Litre
RM 370.00/Btl

ID 220 Drill Disinfection

Fully virucidal, ready-to-use solution for disinfection and cleaning of rotating instruments.

- Bactericidal incl. tuberculocidal, fungicidal, virucidal
- Strong cleaning power especially for fine structures of drilling bits and dental drills
- High corrosion protection and long holding time of 7 days
- Short reaction time: 30 seconds in ultra-sonic bath, 1 minute in Frasator burr sterilizer

Available as :
1 Litre ready to use & 2.5 Litre

Available as : 1 Litre

Available as : 2.5 Litre
RM 230.00/Btl

Orotol® Plus Suction Unit Disinfection

Foam-free liquid concentrate for simultaneous disinfection, cleaning, deodorisation and care of all suction units and amalgam separators.

- Bactericide, including tuberculocide, fungidice, limited virucide (HBV, HCV, HIV) & non-enveloped viruses (adenovirusese, norovirus)
- Long-term effect, no formation of resistance against germs
- Proven compatibility with materials - recommended by leading manufactures

Dilution: 40ml x 2 litre water

Available as : 2.5 Litre
RM 324.00/Btl

MD 555 Cleaner special cleaner for suction units

Foam-free cleaning concentrate for all kinds of suction units and amalgam separators.

- Dissolves encrustations of lime, prophylaxis powder and prophylaxis pearl products
- Intensive cleaning action for deposits and accumulations
- Proven compatibility with materials - recommended by leading manufactures
- Ideal in combination with Orotol plus

Dilution: 40ml x 2 litre water

Available as : 2.5 Litre
RM 293.00/Btl

MD 535 Plaster and Alginate Remover

Ready-to-use solution for removal of plaster and alginates from impression trays and other appliances.

- Neutral special cleaner that is especially fast acting
- Intensive cleaning power for residue-free removal of plaster and alginate
- With activity indicator
- Suitable for use ultrasonic baths

Ingredients: Alkaline components and complexing agents

Available as : 2.5 Litre
RM 357.00/Btl

OroCup care system

User-friendly, Closed care system for the disinfection and cleaning of suction units and amalgam separators.

- Generates an air/water mixture for optimum moistening and effective cleaning of the suction system
- Rational working - one system for the aspiration and suctioning of usable solutions
- Connection adapter for all suction hoses

Available as :
2 Litre care system
RM 308.00/Btl

MD 520 Impression Disinfection

Alcohol-free solution for the effective and material- friendly disinfection and cleaning of impression, prosthetic work, etc.

- Bactericide, including tuberculocide, fungicide, limited virucide (HBV, HCV, HIV) & non-enveoped viruses (adenoviruses, norovirus)
- Application for alginates, silicone, polyether rubber, hydrocolloids, polysulfides etc.
- More precise primary plaster model thanks to effective cleaning action
- No impairment of simensional stability or plaster compatibility

Available as : 2.5 Litre
RM 293.00/Btl

For healthcare professionals only

FD 366 Sensitive Disinfection of Sensitive Surfaces

Solution for disinfection and cleaning of especially sensitives surfaces
- Bactericide, including tuberculocide, fungicide, limited virucide (HBV, HCV, HIV)
- Preparation with extremely low alcohol content, specially developed to last a long time
- Fast acting disinfectant : 1 minute reaction time
- Ideal for treatment units in combination with FD360 imitation leather cleaner

Active substances: Alcohols, QAC

Available as :
1 Litre & 2.5 Litre

Available as : 1 Litre
RM 131.00/Btl

Available as : 2.5 Litre
RM 277.00/Btl

FD 333 Quick Disinfectant

Fast acting, ready-to-use solution for quick-acting disinfection of surfaces of medical devices and fixtures.
- Bactericide, including tuberculocide, fungicide, limited virucidal and effective against non-enveoped viruses (adenoviruses, norovirus)
- Excellent material compatibility
- Fresh lemon scent • Quick drying

Available as :
1 Litre & 2.5 Litre

FD 333 Wipes Quick Disinfectant

Ready-to-use disinfectant and cleaning wipes for surfaces.
- Bactericide, fungicide, virucide
- Quick disinfectant effect: 1 minute
- Residue-free drying
- Perfume-free

Available as :
Dispenser with 110 wipes

Wipe size : 14 x 22 cm

contains :
1 Empty Dispenser + 2 refill pack (Total 220 pcs)

RM 139.00

MD 530 Cement remover/denture cleaner

MD 530 is based on a combination of inorganic acids (5 - 15%) and surfactants (< 1%) in aqueous solution
- Ready-to-use solution for the removal of acid-soluble cements, tartar, oxidation layers, smoking stains, etc. from prostheses,bridges, crowns, spatulas, glass, etc.; also removes corrosion and flux residues
- Excellent material compatibility
- Intensive cleaning action
- Suitable for use in ultrasonic cleaner (e.g. Hygosonic by Durr Dental)

Available as : 2.5 Litre
RM 231.00/Btl

MD 550 Spittoon cleaner

Foam-free, ready-to-use solution for intensive, residue-free cleaning of spittoons

- Problem-free removal of residues, such as lime scale, blood or plaque colouring agents
- Simultaneous cleaning, deodorisation and care of spittoons
- No abrasive components - the spittoon suffers no scratching
- Anti-microbial - effective against bacteria, Tb bacteria and yeast fungus

Active ingredients: alcohols
Available as: 750 ml
Our recommendation: Orotol® plus, Orotol® ultra, MD 555 cleaner

Available as : 750ml

VistaScan Mini Easy 2.0- plug into the future

AI ARTIFICIAL INTELLIGENCE

reddot design award winner

DESIGN AWARD

GOOD DESIGN

▶Quick and easy scanning

The Easy Feed concept allows image plates to be scanned very quickly, one after the other. The VistaScan Mini Easy 2.0 can scan intraoral image plate formats.

WARRANTY 1 YEAR

* Term & Condition Apply

▶Glass display

The high-resolution colour display offers a very user-friendly interface.

▶Simple connection

The LAN interface makes it easy to integrate the VistaScan Mini Easy 2.0 into a network.

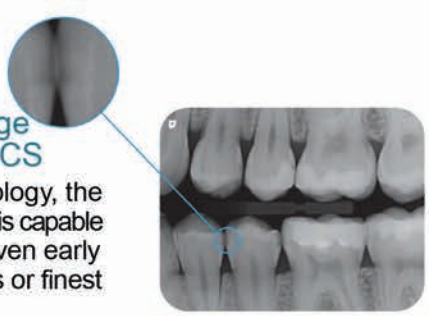

▶The key features

The scope of delivery includes everything you need to scan IQ image plates in sizes 0 and 2.

▶Exceptional image quality thanks to PCS

Thanks to PCS technology, the VistaScan Mini Easy 2.0 is capable of reliably displaying even early stages of caries lesions or finest of bone structures.

For healthcare professionals only

Specifications:

	Mini Easy 2.0
Display	2.4" colour glass display
Plate sizes	S0, S2; optional: S1, S3, S4
Theoretical resolution LP/mm (dpi)	40 (2,000)
Effective resolution LP/mm (dpi)	22 (1,100)
Greyscale (bit)	16 (65,536)
Weight (kg)	approx. 5
Dimensions (H x W x D mm)	249 x 211 x 258
Standby function	Yes
Interfaces	TXT_LAN

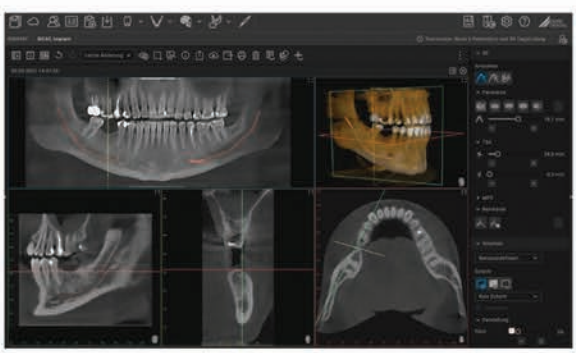

Automatic image rotation

VistaSoft uses an algorithm based on artificial intelligence to check the orientation of intraoral X-ray images using the anatomical features shown and corrects the rotation of the image automatically if needed. This will save you valuable time.

Wrong-side exposure detection

VistaSoft AI automatically detects potential cases where the image plate has been exposed on the wrong side and informs the user accordingly

VistaSoft 3D

The package comes with a full 2D and 3D X-ray licence for VistaSoft, which allows you to view 2D and 3D image data and perform diagnoses - even without your own dedicated CBCT device

Automatic checking of image plate quality

In conjunction with VistaScan IQ image plates, VistaSoft AI automatically checks the image plate quality of each intraoral image.
This ensures excellent image quality on a long-term basis.

Facts, figures and accessories at a glance

Image plate holder system

This product is designed to meet the highest requirements. The premium version uses titanium for the indicator arms. Not only does this result in a significant weight reduction for increased patient comfort. But it also facilitates reliable, accurate positioning for intraoral images.

VistaIntra X-ray generator

Perfectly tailored for a digital workflow with an image plate or sensor. Can also be used in the traditional manner.

Image Plate Cleaning Wipe

Dirt on image plates will show up in the images and shorten their service life. VistaScan Image Plate Cleaning Wipe provide intensive cleaning for the image plates. Advantage: long-lasting, optimum image quality.

For healthcare professionals only

DÜRR DENTAL

A systematic X-ray solution -
perfect in function and design

The intraoral X-ray generator VistaIntra

	VistaIntra DC
Input power	AC 100-240 V 10%, 50/60 Hz
Power consumption (W)	500

Radiation field limiting (mm)	Ø 60 / 30x40 (20x30 optional)
Exposure time (seconds)	0.04-2
Focal spot (mm)	0.4 (IEC 336)
Total filtration (mm)	Min. 2.0 Al
Weight (kg)	24.4 / 26.4 / 28.4
Height (mm)	1730
Max. working length (mm)	1810 / 1960 / 2260

RM 18,500.00 * Term & Condition Apply

Inclusive of JKKP license application

This is what counts:

- ► Modern, sleek design for simple, precise positioning
- ► Simple operating concept
- ► Perfectly matched to the image plate and sensor
- ► Highly reliable, long service life of the X-ray tubes
- ► DC emitter with 0.4 mm focal spot

►Fast, high-quality image results

The VistaIntra leaves the factory pre-programmed, for every tooth region, with the exact radiation dose required for Durr Dental image plates and sensors. It is ready for immediate use and delivers images withperfect exposure.

►DC technology for minimised radiation dosage

The modern DC technology of VistaIntra ensures high repeat accuracy of the radiation dose and therefore reliable high image quality, thereby ensuring greater safely for your patients and employees.

►Easy operation, highly ergonomic

Thanks to the handle on the generator head, VistaIntra can be comfortably and precisely positioned. Selecting the required tooth area is also incredibly easy. The X-ray parameters can be finely adjusted where required; quick switching between two different radiation settings, such as image plate and sensor, isalso possible. Clear icons on the timer improve the workflow and reduce the risk of errors.

►Precisely oriented with right-angle/ parallel technique

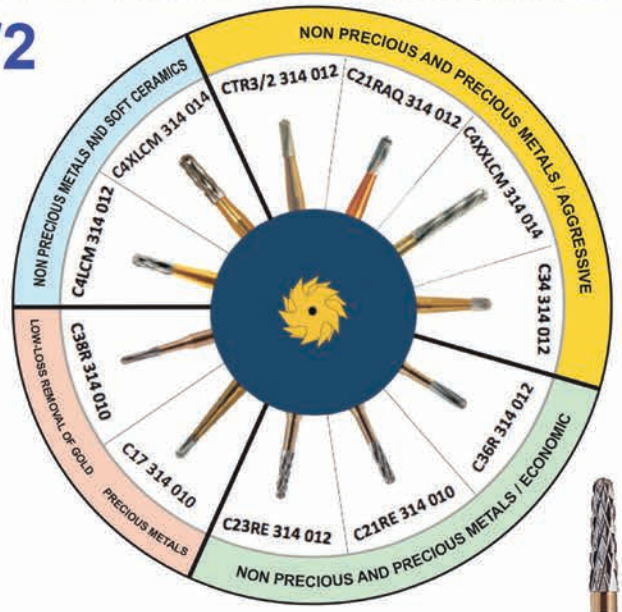

Optimum images can be easily produces together with me new VistaPosition PSP holder system from Durr Dental.

007-018
RM 15.00/pc

BUY 5 FREE 2
021-023
RM 30.00/pc

Your big advantages compared to standard diamonds:

They work
- Fast and durable on hard ceramics like zirconia and lithium- di-silicate
- Cut even faster - reduced chairtime through cutting efficiency; which is increased by at least 20% (mm/min) on all other materials
- Cooler compaired to standard burs in treatments with the same duration
- Excellent price / performance ration

Kit for Veneers

The kit provides an innovative solution to remove tooth structure for veneer preparation technique.
The application of the kit leads ideal material thickness for optimal component fit and colour match of the veneers.

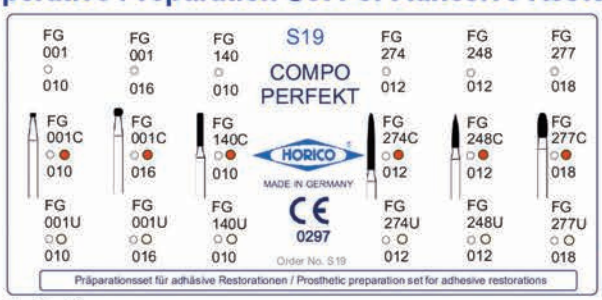

► Different removal depths: AS depth markers
•AS 0.3mm - AS 0.5mm - AS 0.7mm - AS 1mm

Fast Drying, Comfortable and less Irritating

Product Details

Better Effect

- During root canal irrigation, this product is placed in the mouth of them cavity and sucked at the same time, so that a circulating water flow is formed in the root canal, which transforms passive irrigation into active irrigation and impreoves the irrigation effect.

DENTAL LABORATORY POLYMERIZER

The Light Cure machine is economically priced and is a florescent light that is made in Japan and boats a life span of an astounding 5000 hours. It is fitted with a adjustable digital timer and a top notch magnetic noise free fan, with the ability to polymerize a composite teeth tray and produce pre-implantation teeth mould, this light cure machine uses power voltage of AC 110-220V 50/60Hz and weights a modest 2.2 kg

- Japanese made fluorescent light, life span up to 5000hrs.
- Digital timer, 1 ~ 99minutes adjustable
- High tech noise-free magnetic fan
- Capable of polymerizing composite teeth tray
- Capable of making pre-implantation teeth mold
- Highly affordable

Please refer to the Instruction For Use for specific usage of the product.

⚠ Caution

When using FG carbide burs
•Do not use this product for any purpose other than dental treatment. •Always sterilize before use to prevent infection. •Follow the handpiece manufacturer's instructions, insert the shank as far as it will go. Confirm that the bur is fully locked in place, and run the drill outside the patient's mouth first to check for wobbling. Start by running it without making contact, and begin drilling once it is running normally. •To prevent tooth fracturing, be careful not to apply excessive force, drilling intermittently using a feather touch. Burs with narrow, long, or large heads are particularly likely to break or bend, and require particular caution. •Use protective glasses or similar to avoid eye injury during use. •To maintain carbide bur performance and prevent sticking and pulpitis, always irrigate liberally during use. •Properly dispose of burs as medical waste after use. •Never exceed the specified maximum rotation speed, as this can cause breakage.
